

VALIDATE RIGHT TO WORK

Employers in the UK are responsible for ensuring that the individuals they employ have the legal Right To Work. Failure to do so could lead to heavy penalties and fines of up to £20,000 for each individual case and in some cases a 2-year custodial sentence, can you afford to take the risk?

Photocopying and /or scanning ID documents is NOT sufficient... To provide "statutory excuse" against liability employers must verify document authenticity by visually checking them with the owner present - accepting ID electronically is not acceptable.

Establishing your employees' Right To Work whilst minimising risk & protecting your organisation's reputation has never been easier using Validate RTW - Right To Work - a simple, straightforward, no fuss, ID Document Authentication System.

Validate RTW combines easy to use software and industry standard ID Document Readers. Scan, verify and store employees' ID Documents and move away from storing paper documents and cumbersome filing with a system that will readily integrate with your existing HR or other database driven systems.

Validate RTW also includes an easy to use customisable reporting tool enabling both simple and complex database queries of stored documents enabling the production of a myriad of user definable reports including for example: expiring Visas, Passports and BRP's.

Validate RTW can also determine Visa Types automatically and allows customers to create user defined assessments in cases where the default assessments don't quite match the requirements.

Validate RTW provides your organisation with the tools to adhere to UKVI RTW compliance and mitigate risk.

FAST & ACCURATE

Authenticates documents in seconds, typically a Passport, Visa and BRP can be captured in under 90 seconds and removes human error from the document scanning experience.

COMPLIANCE

Validate's built-in RTW Assessment automates UKVI RTW Rules to meet compliance processes.

TRUSTED

Border Control level document forensics technology coupled with online, real time updated database of more than 4000+ documents.

SEAMLESS INTEGRATION

Can be seamlessly integrated with any SQL based HR, Payroll & Talent Management System.

USER DEFINABLE ASSESSMENTS & DOCUMENTS

Significantly speeds up the ID checking process using automated assessments which assist users identify what documents are required by the applicant dependent upon their country of origin.

VALIDATE RIGHT TO STUDY

Developed in partnership with the UK education sector, VALIDATE software is the market leading Right To Study and Right To Work solution.

The traditional “manual validation” of student identity processes are slow and prone to human error, creating huge challenges when it comes to storage, retrieval and reporting. If you do not have effective Right to Study processes, it is likely to impact critical revenue streams, whilst also jeopardizing UKVI compliance audits and above all damage institutional reputation.

Validate prevents these challenges and problems. It simply allows our customers to capture and authenticate data from a range of “pre-defined” and “user-defined” documents and automatically import the resultant data and images into your student record system.

Validate demonstrably reduces enrolment times, typically taking less than 90 seconds to register a student. As a result, queues disappear and a positive student experience is assured.

Validate RTS also includes an easy to use, user definable reporting tool enabling both simple and complex database queries. Typically, these include: Expiring ID & Visa’s, Failed Documents; Report to Police Students, No Shows, Missing Document, etc.

Validate also provides comprehensive and user definable real time and automated reporting which, provides a compressive range of statistics and document analysis that can be utilized at the institutions discretion.

Visa Types are automatically categorised with Validate which, provides for subsequent reporting and export into your Student Records System.

During the past 5 years, the Validate Development Team has gained significant, demonstrable experience of assisting Universities with “Validate/Student Records” System integration processes.

FAST & ACCURATE

Authenticates documents in seconds, typically a Passport, Visa and BRP can be captured in under 90 seconds and removes human error from the document scanning experience.

COMPLIANCE

Validate’s built-in RTS Assessment and Student Engagement capabilities conform to UKVI Compliance processes.

TRUSTED

Border Control level document forensics technology coupled with online, real time updated database of more than 4000+ documents.

SEAMLESS INTEGRATION

Seamlessly integrates with other Student Records Systems including SITS; Banner; UNIT-e; SAP and SharePoint, reducing administration and lowering costs.

USER DEFINABLE ASSESSMENTS & DOCUMENTS

Significantly speeds up the ID checking process through an automated T4 Assessment. Assessments can be customised and additional documents can be profiled (added to the document library) if required.
