

Developed in partnership with the UK education sector, **VALIDATE** software is the market leading right to study and right to work solution.

The traditional “manual validation” of student or employee identity processes are slow and prone to human error, creating huge challenges when it comes to storage, retrieval and reporting.

Validate simply allows our customers to capture and authenticate data from a range of “pre-defined” and “user-defined” documents and all data captured will readily integrate with your existing HR or other database driven systems.

Validate demonstrably reduces enrolment times, typically taking less than 90 seconds to register a student.

As a result, queues disappear and a positive student experience is assured.

Validate also includes an easy to use, user definable reporting tool enabling both simple and complex database queries. Typically, these include: Expiring ID & Visa's, Failed Documents; Report to Police Students, No Shows, Missing Document, etc.

Visa Types are automatically categorised with Validate which, provides for subsequent reporting and export into your existing Systems.

Over the past 5 years, the Validate Development Team has gained significant, demonstrable experience of assisting Universities with the System integration processes.

We have been using Validate ID Software since 2015. In this time it has enabled us to significantly overhaul student enrolment and comply with UKVI's regulations for PBS Sponsorship while not affecting the Student Experience. We would recommend Validate ID to any institution that requires a cost-effective solution to meet UKVI requirements.

ID Verification & Data Capture System

- 

FAST & ACCURATE
Authenticates documents in seconds, typically a Passport, Visa and BRP can be captured in under 90 seconds and removes human error from the document scanning experience.
- 

USER DEFINABLE ASSESSMENTS & DOCUMENTS
Significantly speeds up the ID checking process through an automated T4 Assessment. Assessments can be customised and additional documents can be profiled (added to the document library) if required.
- 

COMPLIANCE
Validate's built-in RTS Assessment and Student Engagement capabilities conform to UKTVI Compliance processes.
- 

VERIFICATION
Verifies all Machine Readable Travel Documents (MRTD).
- 

TRUSTED
Border Control level document forensics technology coupled with online, real time updated database of more than 6200+ documents (7024.xxx only).
- 

GLOBAL DATABASE
Passports, ID Cards, Biometric Residence Permit, Driving License, Entry Visas.
- 

SEAMLESS INTEGRATION
VALIDATE can be easily integrated with your Student Records System. To date we have integrated with SITS, BANNER, UNIT-e, SAP, SharePoint and multiple "Home Grown" Systems.
- 

AUTO RTW DOCUMENT CHECKLIST
Required RTW documents auto-calculated based on Country of Origin.
- 

STORAGE
All captured data stored within a SQL database – hosted within your institution.
